Objective

I am eager to join a forward-thinking organization where I can contribute my goal-oriented and self-motivated approach to project success. Driven to work diligently and continuously learn, I excel at creating pixel-perfect user interfaces that merge design sophistication with seamless functionality. As a collaborative team player, I am dedicated to delivering high-quality code and exceptional user experiences, and I am ready to transform innovative ideas into compelling digital solutions.

Summary

- 1 year of experience web development.
- Developed multiple web development using Angular/React as the implementation framework.
- Hands on experience with developing and maintaining Angular/React front end websites.
- Highly self-motivated and enthusiastic professional.
- Actively involved in the design and application architect.
- Currently working as a Junior Developer at Bizsoft pvt.Limited.
- Associate degree in Computer Science (Cs).

Skills

Programming & scripting Languages	JavaScript, ES6, JSX,TypeScript, HTML, CSS, SCSS
Development Framework/Libraries	Angular, ReactJs, Redux Toolkit, web API
Development Tools & IDEs	Development Tools & IDEs VSCode, Visual Studio, WebStorm
Other Tools	Github, Trello, Jira

Experience

Bizsoft pvt.limited, karachi, Pakistan

Junior Front End Developer
(November 2023 – present)

I was hired as an intern where I started working on The Ongoing Development. Later they hired me as a web developer (ANGULAR, REACT and ASP-Net)

Core Responsibilities:

- Initially hired as an intern, contributing to ongoing development projects and gaining hands-on experience in web technologies.
- Successfully transitioned to a full-time web developer role due to demonstrated skills and contributions.
- Worked with Angular, React, and ASP.NET to develop and enhance web applications.
- Contributed to the continuous improvement and evolution of web projects, applying industry best practices and technical knowledge.

TkLogics, Lahore, Pakistan (Remote)

Junior Front End Developer
(July 2023 – December 2023)

I worked as a Front end Developer on various websites and applications, contributing to both critical and creative projects.

Core Responsibilities:

- Worked on improving the app's user interface to enhance usability and user experience.
- Received and executed design specifications to implement changes on the website.
- Focused on integrating design updates to improve the site's appearance and functionality.
- Coordinated with design and development teams to achieve seamless and effective updates.

Key Projects

Admin Dashboards – Bizsoft pvt.Limited

Worked on designing and developing a product-based dashboard using Angular and TypeScript, focusing on HR and costing dashboards. Integrated APIs for data fetching and managed the entire front-end functionality.

Roles & Accomplishments

- Designed and implemented various dashboards, including HR and costing, to provide clear and actionable insights.
- Managed the entire front-end development using Angular and TypeScript, ensuring a responsive and user-friendly interface.
- Connected and integrated APIs to fetch and display dynamic data, enhancing the dashboards' functionality and performance.
- Contributed to the development of a product-based dashboard, aligning with business requirements and user needs.

Technologies
Angular, Bootstrap, Web API, SQL Data Base, third party
libraries.

Poultry – Bizsoft pvt.Limited

Developed the Poultry website from scratch, utilizing Angular to create a dynamic and user-friendly interface. Implemented web APIs for data integration, and incorporated third-party libraries to enhance the site with animations and card components.
Roles & Accomplishments
- Created the Poultry website from the ground up using Angular, ensuring a robust and interactive platform.
- Utilized third-party libraries to add animations and card components, improving visual appeal and user engagement.
- Implemented web APIs to seamlessly integrate and display data, enhancing functionality and user experience.
- Contributed to the development of a key company software application, aligning with organizational standards and requirements.
Technologies

Angular, Web API, third party libraries.
